

APPENDIX E

Travel Time Calculations and Comparisons

This appendix contains the reduced data for calculated travel times from the formalin monitoring data and USGS water speed data. The following are included:

- 1 - description of travel time calculations
- 2 - travel time calculations from regressed water speed data
- 3 - travel time calculations from fit-by-eye water speed data
- 4 - travel time calculations from June, 1987 measured speeds
- 5 - travel time comparisons - formalin monitoring data
USGS water speed data
USACOE flood crest estimates

TRAVEL TIME CALCULATIONS AS FOLLOWS:

- HOPLAND Distance from the Forks of the Russian River to Hopland divided by the speed at Largo.
Tv.Tm = 19.2 mi./S.(Largo)
- CLOVERDALE Distance from Hopland to half-way point between Largo and Cummiskey
divided by the speed at Largo, plus half-distance between gauges divided by
speed at Cummiskey, plus distance from Cummiskey to Cloverdale divided
by the speed at Cummiskey.
Tv.Tm. = 1.7 mi./S.(Largo) + (6.6 mi.+6.7 mi.)/S.(Cummiskey)
- HEALDSBURG Distance from Cloverdale to half-way point between Cummiskey and Healdsburg guages
divided by the speed at Cummiskey, plus half-distance between gauges divided
by the speed at Healdsburg, plus the distance between Healdsburg guage and 101
bridge divided by the speed at Healdsburg.
Tv.Tm. = 10.8 mi./ S.(Cummiskey) + (17.5 mi.+ 2.2 mi.)/S.(Healdsburg)
- WOHLER Distance from Healdsburg 101 bridge to half-way point between Healdsburg and
Hacienda Bridge gauges divided by the speed at Healdsburg gauge, plus the distance
from the half-way point to Wohler bridge divided by the speed at Hacienda.
Tv.Tm. = 4.5 mi./S(Hacienda) + 3.4 mi./S.(Hacienda)
- GUERNEVILLE Distance from Wohler bridge to Hacienda Bridge gauge divided by the speed at Hacienda
plus the distance from Hacienda to Guerneville divided by the speed at Hacienda.
Tv.Tm. = 3.3 mi./S.(Hacienda) + 6.2 mi./S.(Hacienda)

Table E.1. Summary of cumulative travel times calculated by various methods for the Russian River between Hopland and Guerneville.

<u>Discharge</u>	Cumulative time from Hopland to:			
	<u>Clovdsl.</u>	<u>Hldsbq.</u>	<u>Wohler</u>	<u>Gnvl.</u>

40,000				
Flood	2.3	8.9		23.0
Regressed	2.3	7.1	8.7	11.3

Flood - U.S. Army Corps of Engineers' data

Eye Fit - best curve fit-by-eye through raw velocity data

Regressed - Root function curve obtained by least squares regression

* Travel times calculated using velocity rates corresponding to various discharges during formalin spill. (Discharges averaged over time of two peaks.)

Hopland: discharge rate = 1200; speed = 2.2

Cloverdale: discharge rate = 1700; speed = 2.2

Healdsburg: discharge rate = 2000; speed = 1.9

Guerneville: discharge rate = 3000; speed = 1.3

Travel times calculated from regression curve speeds.
Speeds are from fractional exponent curve forced through 0,0.

*Mi.Fks. = Miles downstream from Forks

General formula for calculation of travel times:

Half-distance between gauging sites divided by the velocity (mph) at the upstream gauge plus the half-distance divided by the velocity at the downstream gauge.

COMPARISON OF TRAVEL TIMES
